

Rate Contract & Order Logistics (RCOL)

Comprehensive workflow for BE, Managers, Stockists, and CFA Agents.

1. User Stakeholders

The system integrates four distinct login personas into a unified logistics chain.

FRONTLINE Medical Rep (BE) Initiates RCs, searches Doctors, maps territory Stockists, and handles WhatsApp re-triggers.	GOVERNANCE Management (ABM/BU/BH) Fiscal oversight. Approves high-discount contracts based on tiered thresholds.
SUPPLY Stockist Intermediary node. Confirms chemist readiness and coordinates with the CFA.	LOGISTICS CFA Agent Inventory custodian. Performs dispatch, invoice generation, and final value matching.

2. RC Logic (Simplified)

Scenario	Approval Logic	Next Action
----------	----------------	-------------

Discount $\leq$ 15%	System Auto	Move to WhatsApp Notification
Discount > 15%	ABM Approval	Pending ABM Dashboard
Discount > 30%	BH Approval	Multi-level validation required

3. WhatsApp Automation & Chemist Bridge

A critical bridge between the internal ERP and the external customer (Chemist), removing manual follow-ups.

- 1 **Approval Trigger:** Once BH/ABM approves, the system pulls the Chemist's number.
- 2 **Automated Dispatch:** WhatsApp sends the list of products, approved RC discounts, and the assigned Stockist's contact card.
- 3 **Decision Loop:**

If Rejected: BE receives a real-time notification. BE dashboard enables "Resend WhatsApp" after manual correction or negotiation.

4. Fulfillment Workflow

The transition from a "Value Contract" to a "Physical Order".

Stockist Confirmation: Upon Chemist acceptance, the Stockist must acknowledge the order in their portal. This signals the CFA to prep for dispatch.

CFA Stock Check: The CFA Agent validates physical quantity. If stock exists, dispatch is confirmed, and a tracking ID is generated.

5. Financial Validation (Invoice Matching)

This module ensures financial compliance by cross-referencing documents from two different sources.

Post-Validation Sequence

Once the CFA clicks "Validate & Submit":

- System updates Order Status to **"Completed"**.
- Broadband Notification: Automated push sent to **BH, BE, and Approval Managers**.
- Incentive calculation logic is triggered for the BE.

Summary of Success Metrics

- Zero manual invoice entry.
- Real-time visibility for BH/ABM.
- Reduced Stockist lead time.
- Automated audit trail for RC compliance.
